

BELT IT™ THE LOOPLESS WONDER.

BELT IT™ KEEPS BELTS FROM RIDING UP. This problem has caused women to struggle with function over fashion for decades, and as a result many have shied away from purchasing and wearing belts. Accessorizing with belts has been limited to their use with belt loops, inelegant use without belt loops or simply going without. This new and unique product eliminates these dilemmas entirely. It is the only product available today that will change the way women look at accessorizing with belts.

BeltIt allows women to express their own personal style by effortlessly accessorizing nearly any ensemble with a belt. Fashion sense dictates that

BeltIt's nearly invisible hook keeps belt in place.

adding accessories creates a polished look. The belt is the quintessential accessory. Complimenting an outfit with a coordinated belt quite simply completes it. Today, women's belts are more of a fashion statement than ever before.

With BeltIt, women can design a coordinated style and feel confident that it will stay

that way. The BeltIt wearer can sit down, stand up, and perform activities such as getting in and out of a car without the awkward fumbling required to make adjustments. BeltIt does not show, and it does not harm or alter clothing.

BeltIt is so easy to operate, anyone can use it. Simply clip it to the waistband of jeans, pants, dress slacks, skirts, shorts, etc. It works with any fabric type from silk to leather and everything in between. Use BeltIt with loop-less clothing or over belt loops. BeltIt has a nearly invisible hook, which extends over the wearer's waistband. It is hidden by the wearer's belt and ensures that the belt does not rise above the edge of the garment. When the clothing is pulled down by stooping, sitting, etc., the belt is carried with it. BeltIt is available in a variety of colors to coordinate with most belts and attire.
